

# TALF Practica 1

María Jesús García Bravo

## 1 Ejercicio 1

1. Find the power set  $R^3$  of  $R = (1, 1), (1, 2), (2, 3), (3, 4)$ . Check your answer with the script `powerrelation.m` and write a LATEX document with the solution step by step.

Siguiendo los apuntes de la asignatura, podemos definir la potencia de una relación como:

Dado  $R \subseteq A \times A$ ,

$$R^n = \begin{cases} R & n = 1 \\ \{(a, b) \mid \exists x \in A, (a, x) \in R^{n-1} \wedge (x, b) \in R\} & n > 1 \end{cases}$$

H{return;

Así que, usando esto último:  $R = (1, 1), (1, 2), (2, 3), (3, 4)$ ,  $R^2 = (1, 1), (1, 2), (1, 3), (2, 4)$ ,  $R^3 = (1, 1), (1, 2), (1, 3), (1, 4)$
